The short saphenous vein lies superficially and closely to the outer border. The Division of the Tendo Achillis. --Place the patient on a bed with the foot extending over the edge; forcibly fiex the foot to make the tendon tense (Fig. 297); draw the skin outward away from the tendon to remove the saphenous vein from danger; introduce the blade of the tenotome with the flat surface parallel with the tendon close to its outer or inner border, as is most convenient; carry the point of the blade to the opposite side of the tendon and depress the handle to a horizontal position; turn the edge toward the tendon and cut carefully through the structure with a guarded sawing motion, while the foot is. firmly flexed and the tendon is pressed upon the edge with the finger. At the last stage of the procedure...
