Oxford University Press Jan 2014, 2014. Buch. Book Condition: Neu. 241x1560x30 mm. Neuware - 'Morphine,' writes Richard J. Miller, 'is the most significant chemical substance mankind has ever encountered.' So ancient that remains of poppies have been found in Neolithic tombs, it is the most effective drug ever discovered for treating pain. Miller explains what scientists know-and don't-about the impact of each drug on the brain, down to the details of neurotransmitters and their receptors. He clarifies the differences between morphine and heroin, mescaline and LSD, and other similar substances. Drugged brims with surprises, revealing the fact that antidepressant drugs evolved from the rocket fuel that shot V2 rockets into London during World War II, highlighting the role of hallucinogens in the history of religion, and asking whether Prozac can help depressed cats. Entertaining and authoritative,...
