Limitations of Hook s law.--Many substances, such as steel and quartz, conform very closely to Hook s law for small strains, --stretches of one or two thousandths, --but all substances deviate widely from this law when the strain becomes great. Many substances are more or less plastic, and do not conform to Hook s law even for small strains. The behavior of mild steel under increasing longitudinal stress is shown in Fig. 79. The line up to the point p is sensibly straight (strain proportional to stress). Above the point p the line be-12l comes sensibly curved, and a slight permanent set remains if the stress 80 is relaxed. A sub-stance strained until it begins to take a permanent set is said to 30 be at its elastic limit. The given sample of mild steel is at its elastic limit...
