Chatterjee, language: English, comment: My teacher's comment: 'What a beautiful, perceptive and moving piece. I strongly recommend that you publish it.', abstract: Time has been conceptualized in various ways by the scientists, litterateurs and philosophers. But here, drawing on a 'utopian' narrative by a Russian author, Mukhopadhyay envisages an empathetic temporality that can create a mysterious compatibility between human time and natural time by ushering in a new temporal mode, a time of empathetically propelled togetherness. At the same time, the work also seeks to explore the ways in which we can modify our anthropocentric systems of thought by realigning ourselves with our planet that also opens us up towards new vistas of imagination. Beginning to invoke an empathetic temporality that changes autumn into spring, we can move towards an unimaginably wonderful future where Time is not conquered...

### Reviews

*Very good eBook and valuable one. This is for anyone who state that there was not a worth reading. You will not truly feel monotony at any time of your own time (that's what catalogs are for concerning if you question me).*

-- Ms. Ona Muller

*This is basically the finest publication I actually have gone through till now. We have read and I also am confident that I am going to likely to read through again once more in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.*
